

OMEED KASHEF

Active Security Clearance | 100 Pierce Street, Clearwater, FL 33756 | OmeedKashef@gmail.com | (319)-504-4867 | linkedin.com/in/omeedkashef

Solutions Consultant – I help organizations transform chaos into clear roadmaps. These roadmaps break down complex business goals into actionable tasks, allowing stakeholders to make informed decisions and build intuitive products. My approach involves diving deep into software decisions and implementation methods to analyze and communicate their potential impact on the user experience, product-market fit, and long-term organizational goals.

SKILLS

- HTML/CSS/JavaScript
- Mongo, Express, React, Node
- Java, Spring Boot, JPA, SQL
- Git & GitHub
- REST APIs & Postman
- Data Analysis, Visualization
- R, Excel, PowerPoint
- Qualitative Research
- Ethnography, Field Studies
- Surveys, A/B Testing
- User Testing
- System Requirements
- Competitive & Market Analysis
- Feature Prioritization
- Use Cases/Scenario Diagrams
- Persona Development
- User Journey, Empathy Mapping
- Design Thinking
- Rapid Prototyping
- Product Presentations
- Client Management

CERTIFICATIONS

- AI Native Full Stack Developer | Authorized by Codeboxx Academy | Completion in August 2026
 - Google UX Design Professional | Authorized by Google and offered by Coursera | Oct. 9, 2023
 - Human Factors Engineering for Medical Technology | Authorized by Emergo by UL | Feb. 6, 2024
-

SELECTED EXPERIENCES

Forward Deployed Engineer – Codeboxx | April 2026 – Present | 4 months | Tampa Bay, FL

- Analyzing business use cases and building requirement documents to generate full stack applications
- Leveraging AI to design state-of-the-art system architectures using MERN and Java/Spring Boot stacks
- Combining UX, human factors, and systems thinking to increase product-market fit and competitiveness

Account Executive – Frontier, a Verizon Company | Dec 2025 – Apr 2026 | 4mos | Tampa Bay Area, FL

- Identified 3 new market segments through deep territory research, resulting in a 20% increase in market share
- Optimized the lead qualification process, improving conversion rates from prospect to demo by more than 25%
- Consistently exceeded sales targets, averaged 115% of quota, and generated over \$280k ARR in 3 months

Product Consultant – Defense Contractor | Jun 2024 – Jul 2025 | 1yr 2mos | San Diego, CA

- Led product development team of 5 through the 510(k) submission of a Class II surgical device
- Trained a team of 5 human factors and UX/UI designers on medical device development and regulatory hurdles
- Designed systems and methods to extract, measure, and integrate the priorities of unmanned vehicle operators into software requirements; designed a user interface that reduced task time and theoretical workload by 40%
- Led design team of 5 to enhance internal company website, prioritize features, and increase ease of navigation

Contractor – Goddard Technologies | May 2023 – June 2024 | 1yr 2mos | Boston, MA

- Managed the integration of parts and information into Agile PLM for the production of a robotic arm at Amazon
- Executed human factors and UX studies for clients across medical device, robotics, web, and mobile apps
- Developed and tested interactive prototypes in Figma with 50+ participants; improved first-click success by 22%
- Streamlined cross-functional communication by organizing information architecture of assets, managing access, defining roles and responsibilities, setting agendas, and prioritizing user needs

Usability Consultant – Haemonetics | Dec 2022 – Apr 2023 | 5mos | Boston, MA

- Conducted task analysis, use FMEA, created usability plans, and use specifications for a Class II medical device
- Applied knowledge of regulatory standards: IEC 62366, ANSI HE75, ISO 14971, and FDA guidance to conduct a failure mode & effects analysis; identified 18 high-risk tasks for a blood-processing device
- Organized summative and formative usability studies, requirements for medical devices, and risk mitigation

Customer Experience Owner – Ford Motor Company | Oct 2019 – Sept 2022 | 2yrs 11mos | Detroit, MI

- Led agile team of 8 to deliver prototype of Ford's first in-vehicle onboarding experience; usability testing and feedback analysis for 60+ participants across 3 user groups resulted in a 95% user acceptance rate
- Mentored coworkers in design thinking, human factors, and product development, creating a collaborative team
- Managed OKRs, timelines, product backlog, sprints, and deliverables with various stakeholders
- Analyzed quantitative and qualitative customer feedback and presented pain points and opportunities
- Created workflows in excel to keep track of product improvement actions, product quality, and NPS projections
- Presented competitive analysis to uncover trends in consumer preference and guide product strategy roadmaps
- Presented on a variety of human-automation topics such as transparency, trust, uncertainty, and awareness

Human Factors Researcher – Driving Safety Research Institute | Aug 2017 – Aug 2019 | 2yrs | Iowa City

- Developed attentional maintenance algorithms for camera-based driver monitoring systems in highly automated vehicles. Results demonstrated a 22% increase in situational awareness and a 28% decrease in reaction time
 - Designed, debugged, and implemented front end of 3-D virtual driving environment for driver behavior study
 - Analyzed gaze transitions, freeze-probe scores, takeover response times, lane deviation distances, and user comfort scores in R to understand human-machine interaction issues in level 3 automated vehicles
 - Thesis: Enhancing Situational Awareness in Highly Automated Vehicles through Driver Monitoring
-

EDUCATION

- Industrial and Systems Engineering, Master of Science (MS), University of Iowa
- Biochemistry, Bachelor of Arts (BA), Grinnell College
